

Gregory Jordan

Information Technology Advisor

Gregory Jordan leads Gray Stone Advisors information technology department. With high level expertise, he develops initiatives and resolves hardware, application and all network issues. In addition, he provides

ongoing first line technical and application support in corporate network environments.

In addition to his responsibilities with Gray Stone, Mr. Jordan works as a LAN technician for one of the world's largest credit card processing companies. There he is responsible for correcting PC and network issues for over 2700 local Windows based PCs. Mr. Jordan is also responsible for the software configuration of over 4000 PCs in North America. His diverse background includes experience in global payment solutions, aviation, science, engineering and automotive industries.

Mr. Jordan began his career with the United States Air Force in 1983. He first served as a Munitions Systems Specialist with the 81st EMS at RAF Bentwaters, England. In 1987, Mr. Jordan returned to Lackland AFB TX to begin training as an Electronic Communications and Cryptographic Systems Specialist. As a secure Communications Technician for the Air Force, 1839th EIG Keesler AFB MS, Air Force Reserve for the 63rd CS Norton AFB CA and California Air National Guard for the 148th CCS in Ontario CA, Mr. Jordan provided installation,

troubleshooting, testing and repair of all cryptographic data and voice communications equipment. He ended active duty in 1989 with an Honorable Discharge, moved to inactive reserve with the closure of Norton AFB in 1992 and, received an Honorable Discharge from the California ANG in 1998.

In 1989, Mr. Jordan began his civilian career with Northrop Corporation's Aircraft and Electronics divisions. He maintained records that accounted for communications security (COMSEC) equipment assigned to Northrop in accordance with National Security Agency guidelines.

In 1993, Mr. Jordan moved from secure communications to PC, network and telecom support. In subsequent contract and employment positions with IBM, Southern California Edison, Canon, TRW, and Gulfstream Aircraft, Mr. Jordan installed and repaired voice and data networks; resolved hardware and software issues for PCs and Macs; performed quality assurance testing for network hardware and software and served as a project manager during the installation of a new LAN for 14 steel facilities located throughout the United States; negotiated equipment savings in excess of \$60,000 annually for ARC Automotive; and created the Disaster Recovery software configuration for Elavon North America.

Mr. Jordan graduated from Pellissippi State Technical College in Knoxville, Tennessee with an Associate of Science Degree. He resides in Tennessee with his wife, two children and eight rescued pets. He is actively involved in the Smokey Mountains Hiking Club, Tennessee Trails Association, and the University of Tennessee Oak Ridge Arboretum.
